### Details

A unique, simple design with emphasis on durability, reliability and good functionality under any circumstances.

The main parts, the carrier and the locking mechanism are made from high quality steel and have been subjected to heat treatments for maximum resistance to strain and wear even under poor lubrication conditions. The air cylinder is a new designed part and needs less air pressure than our other models.

The differential gears used in this locker are that of factory differential. That is, the carrier is delivered empty and all internal components by the original differential must be placed in it.

An electromagnetic air valve, air connection fitting, air hose and an electric switch with LED indication are supplied with the locker.

It is necessary to purchase the fitting air compressor [SKU:AC12V5B](#) in order to be able to operate this product.

## Differential Air Lockers: Grand Vitara XL-7 Rear locker.
