Details

This is a complete gear set for all Jimny models with an electronic transfer case.

We were the first company to design and test a comprehensive solution for the electronic transfer case already from the beginning of 2014 and we have created the right solution for all models with gasoline or petrol engines, for both manual and automatic transmission. This set includes the corresponding "gear" which corrects the speedometer according to the choice of tires.

All of our gears manufactured since May 2018 belong to the second generation gears, which means that they are overall improved and enhanced and have nothing to do with all the cheap replicas that are circulating on the market.

There are the following reduction options:

High 0%, Low -70%

High -7%, Low -77%

High -17%, Low -87%

High -27%, Low -97%

If you want to adjust the speedometer we have the following options from which you can choose as needed: 26-27 ", 28-29" and 30-31" tires.

Units in box: 1 set
